Q12. Some people have said that if all legal cigarettes in the UK are required to be sold in standardized packs that there could be some negative side-effects, although other people dispute this. More specifically please say whether you think plain packaging will cause the following to happen...?

Base: All respondents

	Side-Effects				
	Make it easier to produce/sell counterfeit cigarettes because all packs will look the same	Lead to an increase in the black market cigarettes where smuggled branded packs will be available	Result in people bringing back more branded packs from their travels abroad	Cause kids to turn to the black market, where they can access cheap, branded packs	Result in Government losing more tax revenue to the black market
Base	500	500	500	500	500

Q.17 As you may know, Australia is the only country in the world to implement plain packaging, which took effect in 2012. In 2013, a KPMG study found that levels of illicit trade have increased 151% since the implementation of plain packaging. Based off of the findings in Australia and your experience in your day-to-day job, how concerned are you that levels of illicit trade will increase if the UK government moves forward with plain packaging here?

Q.18 As you may know, the UK Government recently undertook a review of plain packaging evidence and asked a variety of individuals and organizations to present evidence. In the testimony of HMRC, they noted that plain packaging “enhances and diversifies” the risk of illicit tobacco in the UK. Do you agree or disagree with HMRC’s view that plain packaging enhances and diversifies the risks of illicit tobacco in the UK?
