Table 1
Q. 1 Many people currently say that they probably won't vote at all, while others say they would definitely vote.

How likely are you, personally, to vote at the next election?
Q. 2 If there were a general election tomorrow, which party would you vote for?

Data excludes those who score 1/DK/Not registered for likelihood to vote (9\%), or who don't know who they
would vote for (13\%), or who refuse to answer (8\%).
THIS TABLE DOES NOT INCLUDE ADJUSTMENT FOR DON'T KNOW/REFUSERS

## Table 12

Q11 Politicians and the media often talk about the threat of 'climate change' and 'global warming' which some scientists say is being made worse
by carbon dioxide and other emissions. Many countries, including Britain, are committed to reducing the amount of these emissions over the next few years. I am going to read out some ways that have been suggested to achieve this reduction. Please say in each case whether you would be in favour of this policy, or against it.

New taxes on air travel with the aim of reducing the number of flights people take

## Table 22

Q13 The main political parties are currently debating further reform of the House of Lords. Please say whether you agree or disagree with ..

- The House of Lords should remain a mainly appointed house because this gives it a degree of independence from electoral politics and allows people with a broad range of experience and expertise to be involved in the law-making process.

## Table 24

Q13 The main political parties are currently debating further reform of the House of Lords. Please say whether you agree or disagree with ..

- If both Houses of Parliament were elected it would become much harder for governments to get things done since both Houses could claim democratic legitimacy and neither would be willing to back down, bringing the risk of frequent stalemate
