Q.6 I'd like to get a sense of how optimistic or pessimistic you are about Britain's economy. Thinking about all the things that may affect the economy - such as changes in salaries and wages, the level of interest rates and tax, the rates of inflation and unemployment, and the strength of the pound - how do you think the British economy will fare over the next year for the country as a whole?

Britain's deficit is so serious that we must start making significant spending cuts now. Delay will only make the problem worse, increasing the size of our debt and the amount of tax-payers' money going on interest payments, not public services. If we delay, confidence in our economy will weaken meaning higher interest and mortgage rates	232 47%	116 46%	116 48%	24 51%	33 38%	48 45%	29 39%	33 47%	66 58%	73 55%	72 51%	38 38%	50 40%	51 48%	71 53%	55 42%	34 47%	21 42%	103 77%	21 16%	48 60%	36 54%	87 76%	33 26%	47 48%	51 39%	77 52%
There will have to be significant spending cuts in due course, but these cuts should not be made until the economic recovery is much stronger. If we cut spending now we risk increasing unemployment and even tipping the country back into recession, when what we need most is to get the economy growing strongly again	264 53%	138 54%	126 52%	24 49%	53 62%	59 55%	45 61%	36 53%	47 42%	59 45%	68 49%	62 62%	76 60%	55 52%	63 47%	78 58%	39 53%	30 58%	30 23%	113 84%	31 40%	30 46%	27 24%	94 74%	51 52%	81 61%	71 48%

Q.17 Finally, just imagine that this referendum had happened and the 'alternative vote' electoral system had been adopted, enabling people to express second, third and subsequent preferences on the ballot paper if they want to do so. You said earlier that if there was an election tomorrow you would vote for ... Which party would you then give your second preference to, or would you not express a second preference?
